

AGCO C1000 Display Setup

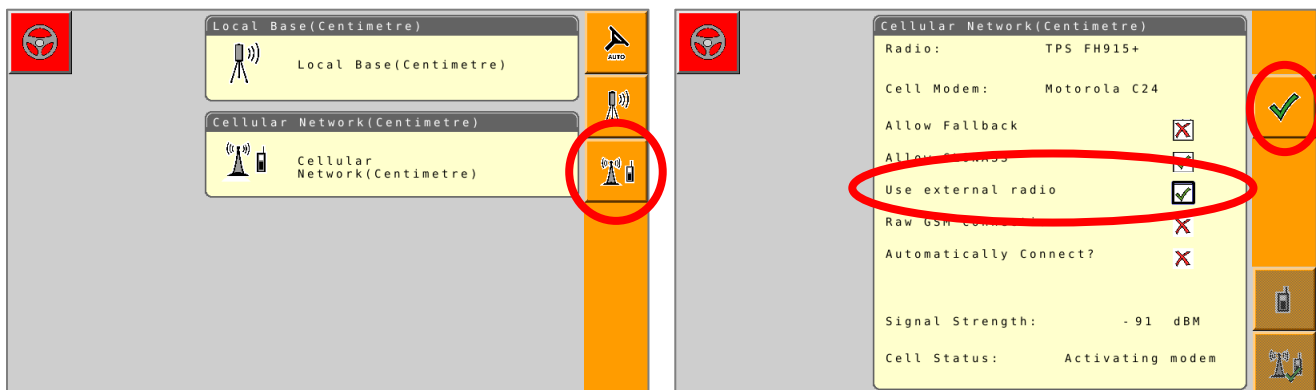

¹ Connect the Beacon to the AGI 4 with the adapter cable and black connector on the back of the receiver

² Navigate to the Wrench icon, then System, then Correction level

³ Select Cellular Network; checkmark "Use external radio"; then select the checkmark on the right

⁴ Set the Correction type to "RTCM3.X"; Serial Port to "D"; Baud Rate to match the Beacon; Parity to "None"; & NMEA Rate to 10 seconds

Android Quick Reference Card

Note: Not all android devices function the same; please try your device before purchasing.

1 Pair the Beacon with android device

2 Download the **DigiFarm NTRIP Client** app, open it, and select the gear in the top right corner

3 Select receiver settings, then receiver connection

4 Select external via Bluetooth, then choose Bluetooth device

5 Check auto-enable Bluetooth box, then go back & select NTRIP Settings

6 Select Network protocol NTRIP v1.0, Caster Port 3101, enter your username & password from DigiFarm; download source table; and get from external receiver

7 Return to the app home screen & tap Connect; the mountpoint list will appear—select the correct one; once selected, the app will start streaming RTK data automatically

iOS Quick Reference Card

1 Pair the Beacon with the IOS device via the settings app

2 Download the **DigiFarm NTRIP Client** app, open it, and allow notifications

3 Confirm Beacon connection within the app; then select your receiver type; & enter your username & password

4 Tap the green Start button and allow location access, then you will start streaming RTK data
