

AGCO C3000 Display Setup

¹ Connect the Beacon to the AGI 4 via the adapter cable and black connector on the back of the receiver

² Navigate to the Wrench icon, then System, then GPS, then Correction; configure the GPS correction source page to match the screenshot:

³ Return to the Run screen to confirm RTK fix as in the screenshot:

Android Quick Reference Card

iOS Quick Reference Card

Note: Not all android devices function the same; please try your device before purchasing.

1 Pair the Beacon with android device

2 Download the **DigiFarm NTRIP Client** app, open it, and select the gear in the top right corner

3 Select receiver settings, then receiver connection

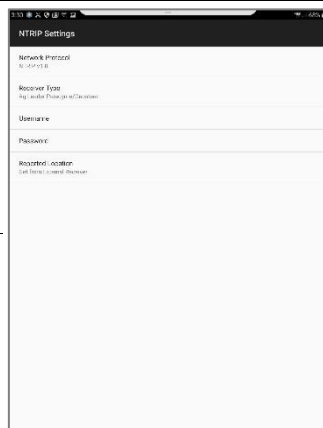

4 Select external via Bluetooth, then choose Bluetooth device

5 Check auto-enable Bluetooth box, then go back & select NTRIP Settings

6 Select Network protocol NTRIP v1.0; select your receiver type; enter your DigiFarm username & password

7 Return to the app home screen & tap Connect; the app will start streaming RTK data automatically

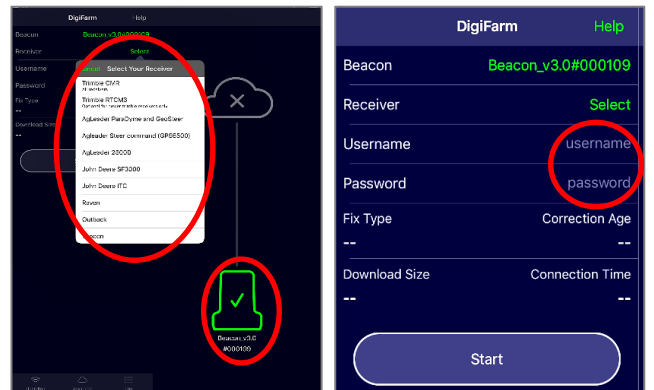

1 Pair the Beacon with the IOS device via the settings app

2 Download the **DigiFarm NTRIP Client** app, open it, and allow notifications

3 Confirm Beacon connection within the app; then select your receiver type; & enter your username & password

4 Tap the green Start button and allow location access, then you will start streaming RTK data
