

Who We Are:

DigiFarm is the largest private virtual base network in North America

How It Works:

Our servers collect satellite data, create a virtual base in close proximity to your location & send corrections to your receivers. Corrections are repeatable & sub-inch accurate for unparalleled precision.

Why We're Best:

- 1-2 Second Convergence
- Sub-inch Accuracy
- No Base Ownership Required
- GNSS-Quality Installs
- 1 inch Vertical Accuracy
- 30-day Survey Process
- Works with ANY Brand of Equipment (John Deere, Raven, AgLeader, UBlox, Trimble, Topcon, NovAtel, Leica) — an Industry Exclusive
- Custom Data Stream for Each Brand to Eliminate Brand Bias
- DigiFarm VBN Covers 33 States & 4 Canadian Provinces including approximately 450 million Acres
- Ultra-Secure Data Center Houses Servers
- Fast & Helpful In-House Tech Support
- Perfect NTRIP solution for Drones, robotic, & autonomous equipment.

SUPERCHARGE
YOUR RTK!

BR1 Mini

THE BEACON

elevate

Seamless Universal Modem

Roof Mounted Modem

Compatible with ALL RTK Receivers Including:

- NEW John Deere Integrated Receiver
- NEW Case Vector Pro Receiver
- ALL John Deere Star Fire Receivers
- Compatible with all current and legacy receivers
- No special programming is needed

elevate is the lowest cost external modem on the market

- Easily move **elevate** with your RTK receiver from machine to machine
- Convenient mag-mount design
- Eliminate in-cab clutter

DigiFarm Exclusive Product

Note on 5G: Today **elevate** services customers with established 4G/LTE technology. 5G technology is aggressively advertised but currently only covers a fraction of the footprint that 4G does across rural America today.
