

BR1 Mini

PROVIDES WIFI TO DISPLAYS ABLE TO USE IN-CAB HOTSPOT

The BR1 Mini Modem is a WiFi only modem that DigiFarm has released to support all precision ag companies who are bringing WiFi enabled displays to the market. This new modem will work with any display that utilizes a WiFi network, including AgLeader In-Command, the Trimble Android displays, the Outback Max and the Outback Rebel. DigiFarm will be shipping the BR1 Mini with a high gain (double shot glass) antenna to help in weak cellular areas. The BR1 Mini is a LTE modem that will also fall back to 3G and 1X service, ensuring the very best reliable performance in the most remote areas where RTK service is required.

The BR1 Mini supports Verizon, US Cellular and AT&T. DigiFarm has data plans to support the new modem including data usage alerts and up-to-date management features in the dealer/customer portal.
